PROGRAM NOTE

Sydegt is not a real word. Heck, it's not even a word at all – it's actually an acronym based off of one of the "king of pop's" hit tunes. All the pitches, harmonies, and rhythms in **Sydegt** come from MJ himself – it's all in there, but completely flipped around and told from my own perspective. In a sense, the chart can be construed as an "hommage à Jackson," and in a lot of ways, it is. But we'll just call it **Sydegt**.
